W05-P3: Display Menu Items from menu json array on both local and Vercel

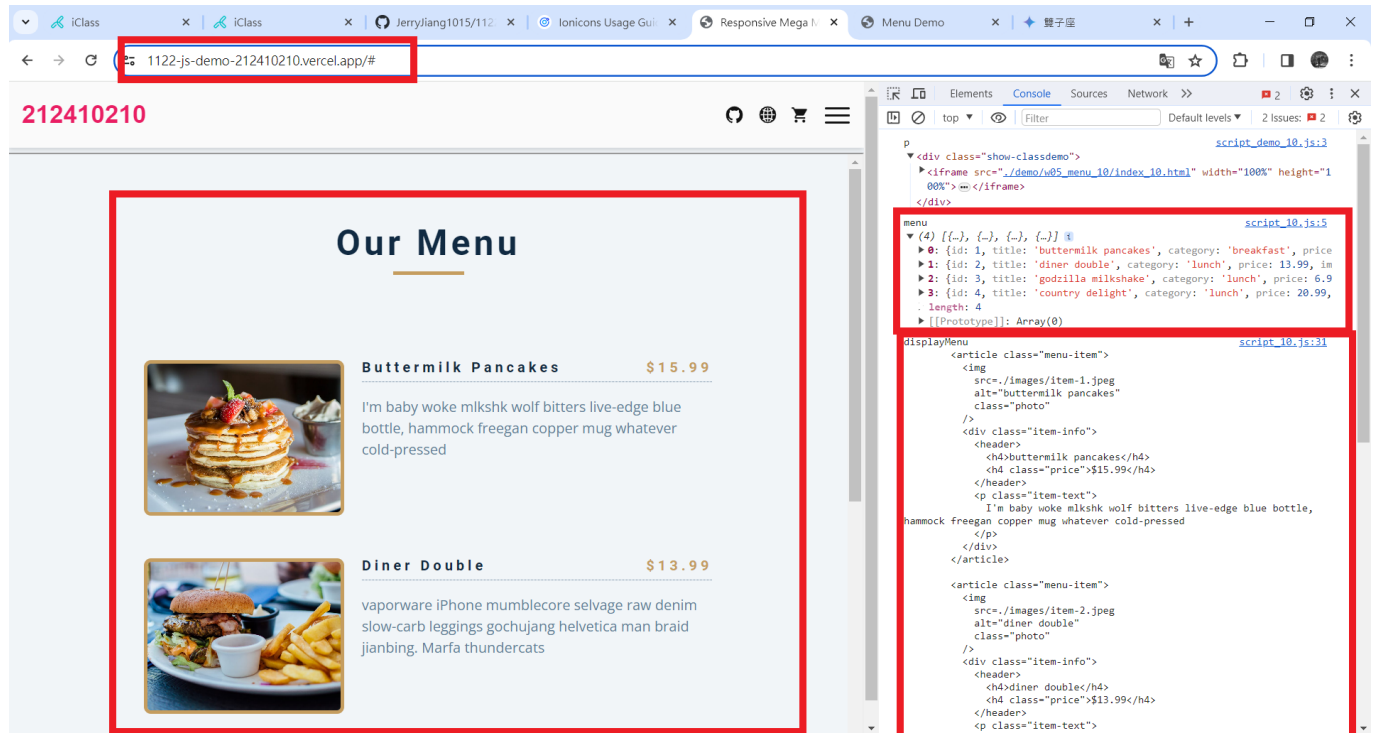

> local

The screenshot displays a local development environment with a code editor on the left and a browser on the right. The code editor shows the `script_10.js` file with the following content:

```
1 import menu from './data_10.js';
2
3 const sectionCenter = document.querySelector('.section-center');
4
5 console.log('menu', menu);
6
7 const displayMenuItems = (menu) => {
8   let displayMenuItems = menu
9   .map((item) => {
10     const { id, title, category, price, img, desc } = item;
11     return `
12     <article class="menu-item">
13       <img
14         src=${img}
15         alt=${title}
16         class="photo"
17       />
18       <div class="item-info">
19         <header>
20           <h4>${title}</h4>
21           <h4 class="price">${price}</h4>
22         </header>
23         <p class="item-text">
24           ${desc}
25         </p>
26       </div>
27     </article>
28   `;
29   });
30   console.log('displayMenu', displayMenuItems);
31   sectionCenter.innerHTML = displayMenuItems;
32 }
33
34 window.addEventListener('DOMContentLoaded', () => {
35   displayMenuItems(menu);
36 });
```

The browser on the right shows the rendered menu items: Buttermilk Pancakes (\$15.99), Diner Double (\$13.99), and Godzilla Milkshake (\$6.99). The console on the right shows the menu data and the displayMenuItems function output.

> Vercel

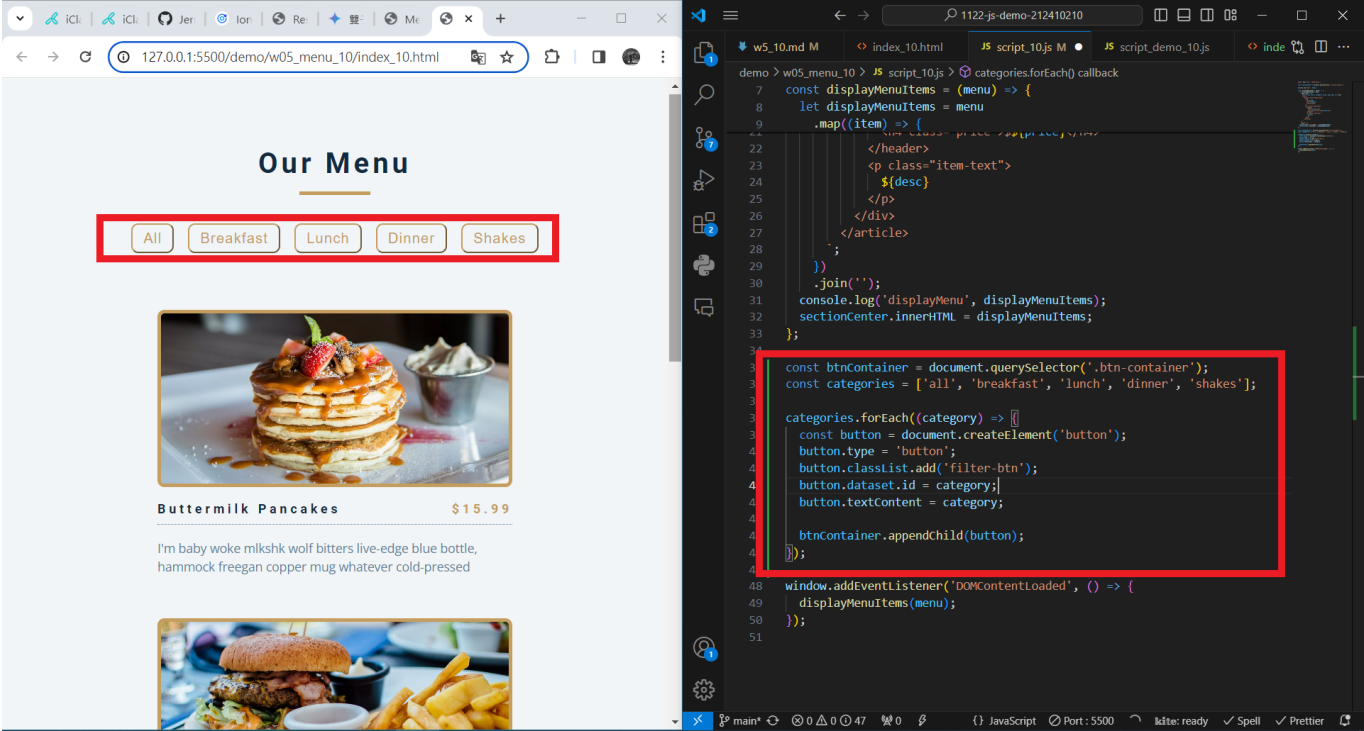

```
